

Press release

Hoffmann Group catalogue now includes full PPE range

Munich, 19 July 2017 – The new [Hoffmann Group](#) 2017/2018 catalogue is finally here. As part of the revised 48th edition of the trusted reference work, Europe's leading system partner for quality tools presents a separate catalogue volume detailing an extensive range of personal protective equipment (PPE) for the first time. Trained specialists will also be on hand all over Europe to provide advice regarding the equipment. In total, the new catalogue comprises around 75,000 items from the fields of “machining”, “hand tools and measurement tools”, “workstations and storage solutions”, plus around 6000 PPE products. The 2017/2018 catalogue will come into effect on 1 August 2017. From this date, the items and product innovations in the catalogue will also be available to order from the Hoffmann Group e-shop: www.hoffmann-group.com.

By expanding its PPE range, Hoffmann Group is consolidating its position as a system partner for the industry: “We have seen a steady rise in demand for personal protective equipment among our customers in recent years,” explains Martin Reichenecker, Head of Sales and Marketing at Hoffmann Group. “We have therefore scoured the PPE market and put together what we think is the best portfolio of products. At the same time, we have also augmented our external sales force across Europe with PPE advisers. This makes us the only provider to offer not only quality tools and workstation and storage solutions, but also a full range of PPE including consultation services all over Europe.”

All areas of the Hoffmann Group catalogue have been revised and around 12,500 items have been added. The new additions to the catalogue include over 4500 items from the GARANT premium brand, including innovations from the “GARANT Master” range, new turning grades, the GARANT Tool24 PickOne individual output system and numerous hand tools and measurement tools. The “hand tools and measurement tools” range also features measuring equipment from the FLUKE

brand for the first time. These products are regarded as particularly reliable and robust by professional users in the fields of electrical testing and thermal imaging and are therefore highly sought after.

“Our customers are having to choose from an increasingly complex range of products – which makes their decision more difficult,” continues Reichenecker.

“That’s why we make a pre-selection for our customers and offer excellent advice on products that require further explanation – in all areas. Added to this is our delivery capacity and adherence to delivery dates, all of which makes us a reliable, high-performing system partner capable of providing comprehensive, high-quality solutions from a single source.”
