World premiere: Secure individual issuing of tools and personal protective work wear

GARANT Tool24 PickOne gives total control over consumable materials and faster goods withdrawal

Munich, March 14, 2017 – Hoffmann Group is celebrating the world premiere of its new individual output system for tools and personal protective work wear at LogiMAT 2017 in Hall 5, Stand 5D46. GARANT Tool24 PickOne gives total control over the consumable materials, as the employees must sign in to the system before their withdrawal compartment opens. Initial experiences have shown that using secure individual issuing can reduce losses; up to 50% for safety gloves or earplugs.

Using GARANT Tool24 PickOne enables customers to monitor the exact stock of classic C-items, such as indexable inserts, grinding wheels and protective gloves. The dispensing cabinet captures the eye with its beautiful design and special features: A LED display shows the employees in which compartment their items are stored (Pick-by-Light) and the withdrawal compartment opens automatically. This allows quick goods withdrawal – even in lower light areas.

GARANT Tool24 PickOne is available in different standard models from the warehouse. The customer has the option of selecting from four different withdrawal compartment sizes and can use a modular principle to individually design the dispensing cabinet. With a loading capacity of up to one tonne (1,000 kg), GARANT Tool24 PickOne also enables around-the-clock management of solid carbide tools and other heavy items. This is possible as the system is set up for 24/7 maintenance-free operation.

GARANT Tool24 PickOne can be combined with all products from the GARANT Tool24 product line and operated with the same software. Perforated

tool panels on the left and right sides of the automatic dispenser enable the neat attachment of Easyfix holders and brackets – again showing the consistent system concept implementation of Hoffmann Group's GARANT workstations and storage. Like all workstations and storage, GARANT Tool24 PickOne is available in ten standard colours, and upon request also in selected special colours.

Image caption:

GARANT Tool24 PickOne has four compartment sizes. The smallest compartment contains smaller C-items in a space-saving layout for individual withdrawal.

The dispensing cabinet can be designed using a modular principle. Depending on the size of the compartments, the cabinet has at least ten levels with 160 compartments, and can have up to twenty levels with 640 compartments.

Hoffmann Group

As Europe's leading system partner for quality tools, [Hoffmann Group](#) combines commercial expertise with both manufacturing and service competence. To more than 135,000 customers this combination guarantees reliability in supply, quality and productivity, in the tooling sector and also in the workstations and storage sector. Optimum and reliable advice, from individual needs analysis through to efficient use of products, is assured at all times. Alongside tools for machining, clamping, measuring, grinding and cutting, the portfolio also comprises hand tools, protective work-wear, workstations and storage and workshop accessories. Customers include major listed companies as well as medium-sized and small companies in more than 50 countries. In 2016, Hoffmann Group generated a worldwide turnover of more than one billion euros. Including [GARANT](#), its own premium brand, Hoffmann Group offers 75,000 quality tools from the world's leading manufacturers. With comprehensive customer service and a delivery quality of over 99 percent as certified by the TÜV, the tools specialist with its head office in Munich is a reliable and efficient partner for its customers.
