CRYPTEX – EXTRA SECURITY PLUS STEAMPUNK DESIGN

Cryptex USB flash drive was designed to protect its user from instant access to the flash drive and further access to the digital information stored on it. In addition to the protection it flaunts a trendy steampunk design that attracts people around.

SECURITY COMBINATIONS

Cryptex has 2 different designs of combination codes.

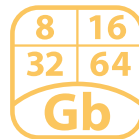

- 5-digit mechanical combination code
- 4 rotating rings code

Both of the codes are built-in and protect your flash drive from immediate access by unwanted users. The owner becomes the only one able to grant access to the information and be sure that it's stored safely. Forget about your personal or corporate information being stolen.
