PAIRING YOUR HERO3 WITH THE WI-FI REMOTE

Before you can use the Wi-Fi Remote to control your HERO3 for the first time, you must pair the two devices. First, ensure both camera and remote are powered **OFF**.

On the camera:

1. Press [mode] to power **ON** your HERO3.
2. Press [Wi-Fi] to turn **ON** the **Wi-Fi,** then press [Wi-Fi] again to access the [Wi-Fi] menu.
3. Press [S] to enter the [Wi-Fi] menu.
4. Press [mode] to cycle to **Wi-Fi RC**, then press [S] to select it.
5. Press [mode] to cycle to **NEW**, then press [S] to select it.
6. You will see [⇒/⇐].

On the Wi-Fi Remote:

1. While holding down [○], press and release [mode] once to power the remote **ON** into pairing mode.
2. When you see [⇒/⇐] on the remote's screen, you can release [○].
3. [☑] will appear on both screens once the devices have paired.
4. The remote will now ask if you want to **CONNECT ANOTHER?** camera.
   a. If yes, press [○] to select **YES**, then repeat the pairing process from the beginning.
   b. If no, press [mode] to cycle to **NO**, then press [○] to select it.

You can now use the Wi-Fi Remote to control your HERO3. For more information or help, visit **gopro.com/support**.
